PRODUCT INTRODUCTION

Maxlide 250 / 500 Tablet is an antibiotic used to treat various types of bacterial infections of the respiratory tract, ear, nose, throat, lungs, skin, and eye in adults and children. It is also effective in typhoid fever and some sexually transmitted diseases like gonorrhoea.

Maxlide 250/ 500 Tablet is taken orally, preferably one hour before or 2 hours after a meal. It should be used regularly at evenly spaced time intervals as prescribed by your doctor. Do not skip any doses and finish the full course of treatment even if you feel better. Stopping the medicine too early may lead to the return or worsening of the infection.

Commonly seen side effects seen with this medicine include vomiting, nausea, stomach pain, and diarrhea. These are usually temporary and subside with the completion of treatment. Consult your doctor if you find these side effects worry you or persist for a longer duration.

Inform your doctor if you have any previous history of allergy or heart problems before taking this medicine. Pregnant or breastfeeding women should consult their doctor before using this medicine.

USES OF MAXLIDE 250/500

In Treatment of Bacterial infections

Maxlide 250/ 500 Tablet is an antibiotic medicine that can be used to treat many different infections caused by bacteria. These include infections of the blood, brain, lungs, bones, joints, urinary tract, stomach, and intestines. It can also be used to treat sexually transmitted diseases. It stops the growth of the bacteria causing the infection and clears the infection. Take it for as long as prescribed by the doctor and avoid skipping doses. This will make sure that all bacteria are killed and they do not become resistant.

HOW TO USE MAXLIDE 250/500

Take this medicine in the dose and duration as advised by your doctor. Swallow it as a whole. Do not chew, crush or break it. Maxlide 250/ 500 Tablet may be taken with or without food, but it is better to take it at a fixed time.

HOW MAXLIDE 250/500 WORKS

Maxlide 250/ 500 Tablet is an antibiotic. It works by preventing synthesis of essential proteins required by bacteria to carry out vital functions. Thus, it stops the bacteria from growing, and prevents the infection from spreading.

WHAT IF YOU FORGET TO TAKE MAXLIDE 250/500 TABLET?

If you miss a dose of Maxlide 250/ 500 Tablet, take it as soon as possible. However, if it is almost time for your next dose, skip the missed dose and go back to your regular schedule. Do not double the dose.
