- Store below 30°C
- Store in a cool & dry place away from direct sunlight
- Keep it out of reach of children

PRODUCT INTRODUCTION

Rezofert Tablet is a dietary supplement used in women to treat polycystic ovary syndrome (hormonal disorder that causes enlarged ovaries with small cysts on outer edges), menstrual irregularities, and hormonal imbalance. It is also used to treat acne and aids in the improvement of ovulation and pregnancy rate. It contains myoinositol, N-acetyl cysteine, D-chiro-inositol, biotin, lycopene, chromium, folic acid, and vitamin D as active ingredients which help to improve reproductive health in women.

N-acetyl cysteine is an antioxidant which improves ovulation and pregnancy rate by aiding in glucose utilization in uterine cells. Myo-inositol, D-Chiro-Inositol, and chromium are insulin-sensitizing agents which aid in improving oocyte and embryo quality thereby normalizing ovarian function and increasing pregnancy rate in PCOS women. Biotin is a water-soluble vitamin that helps to reduce hair fall associated with PCOS. Lycopene is an antioxidant agent which prevents cell damage from free radicals. Folic acid is a water-soluble vitamin which helps to improve the infertility rate associated with ovulation problems in women suffering from PCOS. Vitamin D helps to improve ovarian follicular development in women with PCOS thereby improving the infertility rate.

Take Rezofert Tablet as advised by your physician. Do not crush the medicine. Chew the tablet before swallowing and take one tablet twice daily or as directed by your physician.
